SKILLS

NestJS, Node.js, Express, Fastify, FastAPI, Django, Laravel | Next.js, React, Angular, Vue, React Native | TypeScript, JavaScript, Python, PHP | WebSockets, Socket.IO, REST APIs | Prisma, Mongoose | Tailwind CSS, CSS, HTML, MUI, shadcn/ui, Ant Design, Framer Motion | Redux, Zustand, TanStack Query | Supabase, Leaflet, i18n | CI/CD, Docker

WORK EXPERIENCE

Miznex

Full-stack engineer | Remote (Italy)

Aug 2025 - Present

- Built a scalable Kitchen Display System (KDS) using Next.js and NestJS, implementing a modular architecture with CQRS for order processing and event-driven workflows.
- Implemented real-time order and status updates using WebSockets, ensuring seamless communication between kitchen and frontend clients.
- Designed a secure passwordless authentication system using Redis for token storage, session management, and one-time code validation.
- Developed an advanced, database-backed rate-limiting system with dynamic rule management for per-user control and abuse prevention.

Hexorix

Full-stack developer | Remote (Estonia)

May 2025 - Aug 2025

- Led a team of 3 full-stack developers, owning product roadmap and delivery while accelerating release cycles by 25%.
- Tripled deployment frequency by automating CI/CD pipelines with GitHub Actions, reducing release time from hours to minutes with zero downtime.
- Improved system responsiveness under heavy load by 97% by implementing a Redis-based caching layer to eliminate redundant queries.
- Increased user engagement by 50% by building a real-time property listing map using Leaflet, becoming a core product feature.

Sepehr Academy

Full-stack developer | Remote (Iran)

Aug 2022 - Jan 2025

- Improved code quality and reduced post-release bugs by 30% by leading a team of 5 developers and establishing structured code reviews and agile workflows.
- Architected a scalable end-to-end educational platform using NestJS, supporting modular student, teacher, and admin roles.
- Reduced schema update time by 40% by adopting MongoDB for flexible data modeling, enabling faster iteration on course structures.
- Enhanced platform accessibility and user engagement by delivering a fully customizable multi-language, multi-theme interface with voice commands and an AI-powered chatbot.

Apanco

Frontend developer | Remote (Iran)

Aug 2021 - Aug 2022

- Improved build speed by 60% by developing a high-performance React application using Vite and TypeScript.
- Enhanced runtime performance and reduced unnecessary re-renders by implementing efficient state management with React Context API.
- Reduced form-related errors by 35% by building robust, type-safe forms using Formik and Zod validation.
- Accelerated UI development and ensured visual consistency by leveraging Ant Design to deliver a polished, accessible interface.
